### **TP 700 EcoTech– sound insulation**

To whome it may concern,

the difference between TP700 EcoTech and TP600 illmod 600 is only in the self adhesive used for production. As the self adhesive has no influence on the sound absorption of the product the heat conductivity given in test report 17-001878-PR01 for TP600 is even valid for TP700 EcoTech.

Sincerely,

i.V. Dr. Markus Komma

i.A. Dr. Michael Pronold
